Universal Radiography System

URS

Universal Radiography System

The URS Universal Radiography System offers a small footprint for space-conscious facilities and eliminates the need for costly overhead tube crane construction. The system's U-arm design maintains constant alignment between the X-ray tube and image receptor, regardless of tilt position or image receptor angle.

- Motorized movements from three different locations to maximize operator flexibility, including infrared remote
- Equipped with anti-collision system, including impact sensors
- Available tube head image preview feature (optional, sold separately)
- Choice of 300 kHU, 400 kHU, or 600 kHU X-ray tube
- Choice of 32 kW, 40 kW, or 50 kW single phase generator or 50 kW, 64 kW, or 80 kW 3-phase generator
- Stitching capability with CXDI Control Software NE
- Optional patient table available, sold separately
